

Ample open spaces, sumptuous shows, highly effective installations: meet Cinema.

Our careful research into materials has led to the creation of extremely robust profiles capable of sustaining a base size of up to 24m. The screen has been further improved with the inclusion of structural bars every 4 or 5m, increasing the stability of the inner structure. Even the fabric-anchoring system has been redesigned to make assembly operations quicker and simpler: a very important aspect when mounting such imposing screens.

To lend the frame a modern look and to ensure it harmonises with its surroundings, the aluminium frame is completely enveloped in the fabric, which is fastened directly to the frame via a new anchoring system.

Cinema can be equipped with front-projection surfaces of the Adeo Screen range which, in products of this size (base width from 7 to 24 m), are welded vertically.

Elastic stretchers for an optimal tensioning and an easy installation of the projection surface ▲
